

## Key Features of the *HUNT Dimming Simplicity*<sup>®</sup> Series Digital Dimming System

### Dimming Rack:

#### **Small size**

Industry's smallest, lightest-weight, digital dimming panel.  
Full 12 circuit, 20 amp panel measures just 29" tall and weights only 53 pounds.

HUNT Dimming panels are as small as 1/3 the size and as light as 1/2 the weight of typical panels.

#### **Modular Design**

One man can easily install the system, regardless of size.  
Saves on installation costs.  
Less moving around of existing equipment.

#### **Factory Programmed**

Systems ship "Plug-and-Play", immediately ready for use.  
No waiting for factory start-up.

#### **De-Centralized Control**

Each panel has its own microprocessor.  
Provides system integrity.  
Prevents catastrophic failure.

#### **Convection-Cooled**

No fans mean no maintenance and quiet operation.

### Controls:

#### **LCD Touchscreens**

Completely customizable to accommodate foreign languages, utilize international symbols, or incorporate AutoCAD<sup>®</sup> layout drawings.

Programmable up to 30 levels deep.

Programmable with up to 70 timed events.

#### **Pushbutton Control Stations**

Available with virtually any number of buttons in any configuration.  
Offer flexibility in project design to both specifier and owner.

#### **Programming Remote**

Provides for easy on-site scene changes and light level adjustments.  
Simplifies project oversights and field changes.
